Additional info	<p>Whether you're planning a residential solar project, or looking to reduce high energy costs at your place of business or agricultural operation, our accredited engineering staff will guide you through the process from project conception through system completion.</p> <p>We're your neighbors with our local company based right here in central PA seeking to give back to our communities by promoting job development and actively working with our local school district's technical career center to develop bright, young talent right out of high school. The adoption of solar is very under-developed in Pennsylvania with our state currently producing less than one half of one percent of its electricity generation with solar. Learn more at www.greenway-solar.com. Opportunities abound and we're here to get it done!</p> <p>Being a local Pennsylvania company, we can effectively navigate the complex approval, local permitting, and solar energy incentives process to ensure that you or your business will take full advantage of all benefits relating to your project.</p> <p>Our goals are to help our customers create their own efficient and affordable electricity while reducing harmful pollution and a creating a sustainable future for us all.</p> <p>Let Green Way Solar be your guide on the journey to add solar. We want you to be delighted with all that we do.</p>

We started in 1973 as Commercial Electrical Contractors and grew into the security, fire and water monitoring business in 1984 under the ESCO name. We proceeded to expand and created our KWR division that works with businesses in doing electric audits to help convert to more efficient lighting and or the shopping of their electric source. In the 2000's we created MVE Solar and specialize in the design and build of solar systems. We can design and build your system from start to finish with our certified team of employees. MVE has designed and built one of a kind systems, as well as systems for national know companies. We also pride ourselves by partnering with a nationally known organization. MVE is an ESOP organization (Employee Stock Ownership Plan) and we attribute our success to small business roots. Where hard work, unique skills and the creative ideas of our staff have allowed us to develop long-lasting relationships with our satisfied customers. You can see our work at www.mvegroup.com also look at two of our projects at: https://www.youtube.com/watch?v=PeV99x7oDxl https://www.youtube.com/watch?v=hA-XtxMGU4&t=4s

Additional info	<p>RER Energy Group is a national leader in solar energy based in Reading, PA. We design, build, finance and sell cost efficient and quality solar energy systems to mid-sized commercial and non-profit organizations. Our mission is to educate clients on optimal ways to obtain solar energy savings. We pursue our mission by focusing on the client's needs and working relentlessly to find innovative solutions that lead to more savings through solar.</p> <p>RER Energy Group has developed the largest community solar array in Iowa, the largest school district array in New York, was recently ranked the #1 commercial solar developer in Pennsylvania and is one of the Inc. 5000 Fastest growing companies in America.</p> <p>To date, we have developed more than 40 Megawatts (MW) of solar arrays for over 100 organizations, throughout the United States and Mexico. To fund these projects we have assisted our clients in securing more than \$30 million in State and Federal grants and incentives.</p> <p>We partner with a range of financial investors and work hard to provide appropriate returns to these investors while still maximizing our customer's savings with solar. Our commitment to 'do both' -- provide returns to investors AND maximize savings for solar clients - has led us to develop innovations in financing structures, platforms and partnerships. These efforts were recognized with a prestigious SunShot grant from the Department of Energy through our sister company, Sunvestment Energy Group.</p>

Additional info	Solar States is a Philadelphia-based solar installation and education firm actively investing in positive environmental and economic change since 2008. We have installed more than 500 solar (PV) systems on homes, institutions, via ground mounts, and on commercial rooftops in Pennsylvania, New Jersey, New York, Maryland and Massachusetts. We are a design and build shop with deep in-house expertise in solar design, permitting, solar installation, electrical work and solar equipment maintenance. We have master electricians on staff and a number of our employees are NABCEP certified. As a B Corporation (http://www.bcorporation.net), Solar States focuses equally on profit, the health and wellbeing of its employees, and the environment. We pay a living wage and retain decent hard working people we train and trust. We are ambassadors of the B Corp approach to a healthy local economy. As the founder of the Philadelphia Solar Schools Initiative (PSSI), we have created educational and workforce development partnerships where we offer solar industry training and provide career opportunities to people who are interested and motivated to join the solar industry.
